

TPO and Rubber Roofing Products

# Splice Wash Installation

Seal Trust™ Splice Wash is a clear solvent used to clean dirt and contaminants from single ply roof systems. Especially used on old membranes to remove dirt prior to application of tape primers or seam adhesive. Change rags or applicator pads frequently! Do not allow product to puddle on TPO for long periods of time. Discarded rags should be disposed of properly and will be a flammable hazard. No smoking or open flames on the roof while using this product. Also available in a Low VOC formula for use in OTC states.

## Application Instructions:

This product should be scrubbed into the EPDM or TPO surface thoroughly to remove surface debris. Change applicator pads frequently and cover an area in excess of the area to be seamed. No special applicator is required. When used with TPO, this primer is a cleaner and primer and the use of Toluene Splice Wash is not required. Solvent resistant gloves should be used when applying this product.
